

TeleDart® Dart Syringes for pistols & guns

The function of **TELEDART** dart syringes is based on the 2-chamber-system (drug- & airchamber).

TELEDART dart syringes are re-usable and **are 100% compatible with all common remote darting systems.**

Why TeleDart?

UNBREAKABLE: Due to a special plastics compound **TELEDART** dart syringes are unbreakable. Their surpassing durability is unbeaten and cannot be compared with darts of other manufacturers.

STABILITY: The special material makes **TELEDART** dart syringes worldwide leading in stability and resistance to deformation as it does not dry out or absorb any humidity. **TELEDART** dart syringes always fit into the barrel and so ensure safe working throughout all climatic zones of the world.

PERFECT BALLISTICS: **TELEDART** dart syringes are constructed of only one piece and the flight results especially convince at large distances.

QUALITY: Before shipment every single dart is tested strictly according to DIN EN ISO 9001:2008. Completed by the **TELEDART** needle the user can rely on a safe and absolutely leakproof unit.

INNOVATIVE:

TELEDART offers the 5cc dart for 11mm standard barrels.
